## OUR COUNTRY'S TRADE

January Comparisons and February Outlooks.

EXPERT OPINION OF DUN

REMARKABLE SHOWING OF THE CLEARING HOUSE.

Decline In Wheat the Most Striking Feature of the Week-Iron and Steel Steadily Gaining - Satisfactory Demand For Woolens-Week's Failures.

New York, Feb. 4.-R. G. Dun & Co.'s Weekly Review of Trade will say in its issue tonorrow; Actual payments through the clear-

ing houses in linuary made a remark-able showing, much larger than in any previous month, RES per cent larger previous month, 383 per cent larger than the same month last year and 7.1 per cent larger than in 1832. The failures in Jamany were smaller than in record, and were probably smaller than in any other Jamany since 1881. The statement by branch offices given this week shows a surprising gain in most departments of manufacture and trade. Meanwhife the money market is as confident as ever, gold does not come from Europe in large amounts only because landers among a money already in the landers are heavily in favor of the United States.

DECLINE IN WHEAT.

Perhaps the most striking feature of the week has been the decline in wheat. With exports of 2,694,517 bushels against 1,70,366 last year, flour included, from Aminute ports, and 768,49 from Pacific ports, against 844,323 bushels last year, the temper of the market has been weaker. The report of the agricultural department has had some influence, although its figures are het generally credited as reliable. The whost market has turned largely upon the operation of a Chicago speculator, but the fact remains that the price depends largely upon foreign needs and upon the comparative scarcity of American supply.

TRON AND STEEL

The iron and steel manufacture is steadily caining in consumption of pig iron, sithough the production of the material is still in excess of immediate demands, but not enough to cause a decline in prices in Pilinburg or Chicago. Even the southern producers are able to get a full price at Chinaco and in the east, and anthracite pig is unchanged. The demand for finished products has been very heavy, and includes for structural work 5,000 tons for the state capitol building in Pennsylvania, 4,000 tons for the court house at Denver, 4,000 tons for elevated rall-ways at Chicago, and numerous small buildings in various parts of the country. The demand for car building has been very heavy both at the enst and west, and the plate demand increased at the east on account of orders from shippards. For plates the demand from the plate works has been very active. The prespect of a combination of wire manufacturers has stimulated the demand and raised the price for wire rods. The la quiet and shonly at 1.55 cents, with a visible supply Feb. 1 of 21.120 tons against 12.252 a year ago. Experts of capper in January were about 19,225 tons against 5,906 last year, and the price is held ut 11 cents for lake.

There is a better demand for cotton goods since the governal stoppage of works at the cast, but there is no indication as yet of material gain as respects unsold stocks onhand.

In woolen goods the demand is allogether more satisfactory, an advance of about 20 per cent being paid on most grades of the finer woolens and worsters, and nearly aff the milk are as the chief markots were \$250,000 pounds, of which \$250,000 pounds were domestic against 12,582,700 pounds hist year, of which \$252,000 pounds were domestic.

Failures for the week were 25 in the United States, andire 21 last year, and 25 in Carnella, against 25 last year, of which \$250,000 pounds were domestic.
